Age: 34

Gender: Male

Email Address: Sunyape@163.com

Home Address: Shanghai

Years of working: 11+ Years of software development

PROFESSIONAL SUMMARY

10+ years of software development experience, primarily in C# / .NET ecosystem. Proven track record building reliable backend microservices, configuration platforms, observability systems, and desktop application support infrastructure in financial environments. Strong problem-solving skills, quick learner of new technologies, comfortable in cross-cultural & English-speaking teams.

KEY SKILLS

- **Languages:** C# (expert), Java, TypeScript/JavaScript, Python (familiar)
- **Databases:** SQL Server (strong), MySQL
- **Frameworks & Technologies:** .NET Framework, .NET Core / .NET 6+, Spring Boot, React + TypeScript
- **DevOps & Tools:** Git, Jenkins, OpenShift, Harness, Kafka, OpenTelemetry, Prometheus, Grafana, Kibana, S3, Liquibase
- **Others:** Microservices, CI/CD, High-availability systems, Observability & Monitoring, Identity & Access Management

WORK EXPERIENCE

Citigroup Financial Information Services (China) Co., Ltd.

2021/03 - 2025/09

App Developer / Assistant Vice President

- Designed and implemented a new company-wide configuration center microservice platform (Spring Boot + React) serving hundreds of internal applications; responsible for data model, Liquibase migrations, high-availability deployment on OpenShift, Kafka-based change notifications, and rolling updates.
- Led development of application monitoring & observability system using OpenTelemetry: collected Prometheus metrics & user actions, routed data to Grafana/Kibana for alerting and to database + Tableau for BI analytics.
- Built secure log upload feature allowing remote collection of local application logs from user desktops → Kafka → S3 storage, significantly improving troubleshooting efficiency.
- Developed React + TypeScript frontend for viewing application usage statistics and downloading logs from S3.
- Implemented .NET Core token-based authentication & authorization service for the desktop runtime platform, coordinating secret management across dozens of client teams.

Unisys (Shanghai) Information Technology Co., Ltd.

2017/05 - 2021/03

Software Engineer

- Led development of distributed parallel processing feature for ETL product management module (v6.0), successfully delivered to clients with significant performance gains.

- Major contributor to large-scale code refactoring initiative: improved test coverage, code quality, and maintainability of core ETL system (C# + Entity Framework + ASP.NET).
- Delivered dozens of English technical presentations and demos to 20+ colleagues across China, India, and Australia.

Wuhan Chuangjing Visual Technology Co., Ltd.

2014/06-2017/02

Software Developer / Team Lead

- Led 4–5 person team to deliver a large-scale 3D simulation maintenance training system for naval vessels; managed requirements, modeling, development, on-site deployment, and customer acceptance across multiple cities in China.
- Participated in development and delivery of several other 3D simulation projects.

EDUCATION

Hubei University of Automotive Technology

2010/09 - 2014/06

Bachelor degree in Software Engineering

LANGUAGES

- **English:** Proficient (working language in multinational teams since 2017)
- **Mandarin:** Native
